```
FitnessTracker <--- this is the root directory of R project
   CaseStudy_data <--- all the manipulated datasets stored here
        daily_data_merged.csv
        duplicates.txt
        - Hourly_data_merged.csv
       - metadata_orig.txt
       - minute_data_merged1.csv
       - minute_data_merged2.csv
   FitBit_data <--- all the 12 original datasets stored here
        dayly_activity_merged.csv
        heartrate_seconds_merged.csb
   figs <--- all the generated figures stored here
       - barplot1.png
       - correlogram1.png
        correlogram2.png
   r_scripts <--- all the scripts for the report stored here
       - Clean_data.R <--- generates the transformed datasets</pre>
        Create_metadata.R <-- generates the metadata table
        Generate_plots.R <--- generates the all the plots</pre>
BellaBeat_analysis.Rmd <--- Rmarkdown file for the actual report
 BellaBeat_analysis.html <--- the html format of the actual report</pre>
Case_Study_Guidelines.pdf <--- Google Data Analytics instructions
FitnessTracker.Rproj <--- the main R projct</pre>
```
